## OBJECTIVE

Aspiring software developer seeking a position to leverage my technical skills and academic background to contribute to innovative projects and enhance my professional growth.

## EDUCATION

### Visvesvaraya Technological University

*Master of Computer Applications*

### Vinoba Bhave University

*Bachelor of Computer Applications*

Bangalore, India

CGAP 8.49 September 2024

Hazaribagh, India

CGAP 7.67 August 2022

## EXPERIENCE

### C R Technologies (Remote)

December 2023 – January 2024

*Web Development Intern*

- Worked on diverse web development projects, managing frontend tasks.
- Key Projects:
  - Resume Builder: Developed an interactive platform for creating professional resumes.
  - Music Player: Created a dynamic and user-friendly music player application.

## PROJECTS

### Android Application — Flutter(Dart), Firebase

- Developed an Android application that recommends the best clothing colors for users based on facial analysis.
- Implemented facial recognition to scan users' faces and analyze skin tones and facial features.
- Utilized Firebase for backend services, including user authentication, data storage, and real-time updates.
- Integrated an algorithm that suggests clothing colors that complement users' natural complexion and appearance.

### Reminder App — Flutter (Android app)

- Developed a feature-rich Android reminder application designed to help users set and manage reminders effectively.
- Created an intuitive and clean user interface with easy navigation to add, edit, and delete reminders.
- Integrated dropdown lists for selecting days of the week, time, and activities, ensuring an organized reminder setup.
- Implemented sound notifications to alert users when reminders are due.
- Ensured full compatibility with Android devices and tested for smooth performance across different screen sizes.

### Shopping App — Flutter (Android app)

- Developed a comprehensive Android shopping app offering a seamless and user-friendly online shopping experience.
- Used Flutter to create a highly responsive and modular UI with smooth navigation between product categories.
- Integrated APIs to fetch product details, user reviews, and real-time stock availability.
- Implemented features like a shopping cart, wishlist, and secure checkout process for an enhanced user experience.
- Optimized the app for performance, ensuring smooth functionality across various Android devices and screen sizes.
